THE SCORE

THE FUTURE IS TERRIBLE AND SEXXY

The year is 2092 and YOU are on Mars Colony - a barely held together hellscape filled with crooked earthlings, sexy mutants, & robots in beta. Your life sucks, but the dream of carving out a piece of personal paradise seems almost within reach.

To complicate matters, rogue scientist Darius Bronson has quietly cloned himself into a sentient STD and unleashed it upon Mars Colony. Once infected, STD Darius Bronson's will merges with that of the host, giving them desires to seduce & infect the uninfected...and once fully matured, to kill the finance minister by any means possible.

The future is already a shit show. Try not to fuck it up more.

NEW PLAY DYNAMIC: THE STD

This dynamic can be used or ignored as much as players would like, and is a great tool for those struggling to find their character's purpose in a scene. Infected? Seduce others, or hunt down & poison the finance minister or anyone who looks like them. Not infected? Put on your tinfoil hat to figure out why everyone you meet is trying to win your affection!

Before play have everyone roll a die. 1-2 means you're infected; 4-6 means you're in the clear. If no one rolls a 1 or 2, the lowest roller is infected. Feel free to change these numbers around if you'd like more or less players to be infected.

The virus is not guaranteed to have the same effect on everyone, and in the case of A.I.'s, can mutate entirely upon absorption into any of their biological components. Play with it how you'd like!

Hi, Dean. This is Brenda at Office. Depot. I was calling to let you know that we cannot print your file because of the picture of a penis we have a very strict nudity in pornography policy that we have to adhere to and I did speak with one of my managers, and he did let me know that we would not be able to print this so the order is going to be canceled. I'm sorry for the inconvenience, and I hope you have a good day. Thank you.
